

Flight Attendant PERBID and PERRLF Changes

Effective March 6, the second page of the Permabid (PERBID and PERRLF) screens will be modified. The changes eliminate the display of 727, 747-100/200 and D10 equipment, as United no longer operates these aircraft. All other Permabid screens remain the same. For flight attendants with Permabids on file, the requests will be automatically converted to the new screen displays on March 6th. Here are the highlights:

PERBID

- After displaying PERBID and completing the first page, tab and roll-up to page 2. The equipment preferences (EQP PREFERRED) have been modified. To select specific equipment to be retained in PERBID, rank this category (1 through 15), then either place an N to the right of the equipment indicator to reject an equipment type or prioritize by entering 1 through 6, 1 being the first choice. (Note: 320 represents both A319 and A320 airplanes.) This area has also been expanded for future use.
